

**Location:** Taaeen/ ADNOC

**Date:** April 2025

**Duration:** 4 Days

**Fee:** English

**Course Title:** International Well Control Forum (IWCF) Certificate - Level 4 -Production Engineers

### Learning Objectives:

- Gain advanced knowledge of well control principles and practices.
- Understand pressure control during production operations.
- Demonstrate competency through IWCF certification.

### Target Audience:

- Production engineers
- Drilling supervisors and engineers
- Wellsite managers

### Daily Course Outline:

#### Day 1: Introduction to Well Control Principles

- IWCF certification requirements and key concepts
- Well control fundamentals and pressure control basics

#### Day 2: Advanced Well Control Methods & Equipment

- Kick detection and shut-in procedures
- Well control equipment and BOP operations

#### Day 3: Well Control Scenarios & Practical Simulations

- Real-world case studies on production well control
- Hands-on well control simulations and emergency response planning

#### Day 4: Final Assessment & Certification Preparation

- Review session and practical drills
- IWCF written and practical assessment
- Certification issuance
